

Compute Earnings that Include Tips

EXAMPLE

Corinne is a bellhop at a hotel downtown. She earns \$4.50 an hour plus tips.

In one 40-hour workweek she earned \$330.00 in tips. Find her total income for the week.

Step 1 Find weekly wages

$$\begin{array}{r} \$ 4.50 \text{ Hourly wage} \\ \times 40 \text{ Hours worked} \\ \hline \$180.00 \text{ Weekly wages} \end{array}$$

Step 2 Add tips to weekly wages

$$\begin{array}{r} \$ 180.00 \text{ Weekly wages} \\ + 330.00 \text{ Tips} \\ \hline \$ 510.00 \text{ Total income} \end{array}$$

Corinne's total income is \$510.00.

Directions Compute the answers to these problems. Write your answer on the line.

1. Derek works 40 hours as a skycap. He earns \$2.50 per hour plus tips. In one week, he earned \$250.00 in tips. What was Derek's total income? _____
2. Lisa waits tables in the local diner. In one week she worked 32 hours and earned \$425.00 in tips. If she earns \$2.25 per hour wage, what was her total income? _____
3. Marti washes windows in an apartment complex for \$6.25 per hour. One week residents were so happy with her work that they tipped her an additional \$126.00. In her 40-hour week, what did she earn? _____
4. Tashia shampoos hair part time in the beauty shop. She earns \$5.15 per hour for 20 hours a week. If her customers tipped her \$30.00 in one week, what was her total income? _____
5. Marcell dries cars at the car wash. He earns \$5.15 per hour for 40 hours and earns an average of \$250.00 in tips. What is his total income? _____
6. Calvin delivers pizza 20 hours a week and earns about \$8.00 in tips per hour. In addition he earns an hourly wage of \$2.75. What is his average total income? _____
